SUMMARY OF INFORMATION

Alleged Russian Espionage Agents in China.

The following information deals with individuals of Russian ancestry now in China who, by virtue of education, training or experience, are deemed to be potentially useful to the USSR for espionage work in the United States.

[REDACTED] was in Berlin 1946 reported
to have been active in Germany for Soviet intelligence, specializing
on military matters and war. In early 1948 she claimed to be engaged
(or married) to an American prisoner. Nothing has been heard of her
since.

She worked in an insurance company in Moscow, where she was much involved in the Russian economy. It is now said whether she was acquainted with Klement Gottwald for the benefit of the Third and Soviet groups with whom she was friendly.

██████████ throughout 1961 appeared to
be working as a Soviet intelligence in Shanghai.
In 1961, he was reported to have joined the staff of the
Shanghai Soviet Consulate-General. She was registered to the hotel in
1961.

worked for Soviet intelligence in Peiping. She is the young
(19 or 20) daughter of the former head of the Association of
Soviet Friends, who worked for some months in Executive Headquarters,
eventually returning to Soviet intelligence, had more money than her
own father could supply her, and appeared to have been selected
as a source of development by Soviet intelligence.

... a genuine Soviet citizen from the
time she returned in 1946 was, and perhaps still is, a co-worker in
the Russian Soviet intelligence. She is believed to have had
a great deal of experience in military intelligence, and to have been
assigned to that work in Shanghai in 1947. There is no evidence,
however, that her efforts were successful. Soviet intelligence has
continued to employ the same and other similar citizens in the Pacific
operating networks. Potentially dangerous, probably the most so of
this kind, if she is ever assigned to America or Americans.

... who has recently
been identified as a spy in Shanghai. She is now being
by the U.S. and is working on the work of the U.S.
She has been employed for years with Soviet intelligence

MEMORANDUM

From: Fleet Intelligence Officer.
To: Chief of Staff.

Subject: [REDACTED] alias [REDACTED] Information on.

1. On about 5th August 2 U.S.N. officers, one Ensign and one Lieutenant appeared (names were obtained and subsequently misplaced) in the intelligence office and stated they were passing through TSINGTAO in an LST and had been ashore to the Edgewater Mansions on two different evenings. During the course of their visits they got into conversation with a [REDACTED] who had a concession at the Hotel. [REDACTED] showed an undue interest in naval matters and asked them a number of pointed questions. Specific questions were:

(a) How large were the crews on LSTs now that the war was over.
(b) How many LSTs was the Navy going to maintain in China and the far east.

(c) How about the crew, were they veterans or all newly enlisted men.

(d) Are all other U.S.N. ships fully manned at present or are they running short handed and what was the efficiency of the ships now. [REDACTED] had heard from other officers that the efficiency of the new crews and ships operation in general was way down.

Comment:

The above questions when interspersed among general remarks could simply be a desire on the part of a merchant who deals with Navy personnel to show an intelligent interest and thereby make a favorable impression and also a merchant willing to U.S.N. personnel could be expected to have vital interest in the number of prospective customers he might expect during a forthcoming period. On the other hand these questions, particularly the ones on efficiency and percentage of manning of vessels are of distinct value to an intelligence agency preparing an order of battle. These items cannot be accurately obtained from public sources.

2. It has been ascertained that [REDACTED] came to TSINGTAO from TIENTSIN. That his father is the manager of the USSR Bank in TIENTSIN. and has a fairly lucrative business in the curio shop. He buys cheaply in TIENTSIN and has his cargo flown to TSINGTAO by navy plane.

Comment:

Inasmuch as it is well known that the USSR Bank officials are definitely party members and trained in intelligence it may be assumed that [REDACTED] passes information to his father and very probably receives directives from his father.

Whether for pay or for patriotism cannot be estimated at present.

3. Subsequently [REDACTED] stated that two officers had said to him that [REDACTED] had asked them several questions on naval matters. These officers [REDACTED] and [REDACTED] on being interviewed reported that [REDACTED] appeared to show a more than normal interest in naval matters, equipment and dispositions of units. At that time they could not answer the specific questions but considered the matter of sufficient importance to report to the intelligence officer.

4. [redacted] visited [redacted] at the Hotel and was invited to Deff's house for the evening. [redacted] reported that [redacted] appeared to be a very intelligent person. His [redacted] and [redacted] is misleading in that superficially he may not make a [redacted] but after talking to him at length in his native tongue [redacted] was above the average in intelligence and may be [redacted] as a smart operator.

During [redacted] visit, [redacted] expounded at length on the Soviet system and showed a good knowledge of international politics and economics. He gave some impressive arguments for Communism. [redacted] showed much interest on the subjects for Radar and U.S. submarines and submarine operation in general.

CONCLUSIONS

From the above rather superficial investigation it is believed that Deff is either officially or unofficially acting as a Soviet agent. It may be concluded:

- (a) [redacted] is in a very favorable position to obtain specific and classified information from U.S. personnel.
- (b) That [redacted] does obtain specific information from U.S. personnel and that this information is passed on to accredited Soviet espionage agents.
- (c) That some of the information obtained by Deff is valuable to the Soviet government by definite information of the state of readiness of U.S. Navy units in the Far East, it is possible to make an accurate analysis of U.S. International political intentions.
- (d) That some of the information [redacted] is in a position to obtain is necessary to the USSR in preparing their OOB on US Forces VIE: it is known that the USSR intelligence does not rely on this information from open sources i.e. newspapers, radio, congress, etc. that their policy demands that OOB data be checked by direct method.
